

Use the Achievements Tool

The achievements tool allows instructors to designate criteria for issuing rewards to students in the form of both badges and certificates. Students can see which rewards they've earned and what is required of them to receive additional rewards, providing insight into learning progression toward defined competencies. You can easily see which students have reached learning milestones.

- You create achievements in course content areas -OR- from the Control Panel > Course Tools > Achievements.
- Any rewards students earn appear in their course Tools.
