Create a Mediasite Presentation Link in Blackboard

There are two ways to link to a Mediasite Presentation:

From within a Content Area, choose the **Tools** drop-down menu from the Action Bar and select, **Mediasite - Link to Presentations**

- or -

Use the **Text Editor, Mashups** function and select, **Mediasite Presentations**

Enter the name of the presentation. (Use **Advanced Search** as needed; entering creation date parameters, for instance, will narrow the search)

Click **Search Presentations**

Students will click on the presentation’s title to view the video. The video can also be opened in a separate tab.
